preface i decided to write this book criminal procedure from first contact to appeal after i had taught criminal procedure for several years during each course my students typically asked a litany of what if questions and became curious about the rules of criminal procedure after the police arrest and book a suspect students also expressed frustration with the fact that many of the leading books on criminal

procedure presupposed a certain degree of familiarity with the criminal process including an understanding of basic terminology students came to loathe these books excessive use of legalese and obtuse descriptions of criminal procedure topics that had no real life applications in addition students frequently pointed out as did i that there are often significant differences between what the courts require and what happens in the real world of criminal justice for instance consider the definition of a seizure for the purposes of the fourth amendment a seizure occurs when a reasonable person would believe he or she is not free to leave yet many times students find this definition wanting and ask if a person is not seized according to this definition is he or she really free to leave this question highlights the differences between what this book calls theory and reality it and countless other similar questions prompted me to write a criminal procedure book of my own one that takes a comprehensive yet basic approach to criminal procedure and that connects the material to the real world with examples and exercises by way of preview then this book presents an introduction to criminal procedure from the point at which an individual first comes into contact with the police all the way through the appeals process approximately half of the book is devoted to traditional criminal procedure topics notably search and seizure as well as interrogation and identification procedures the remainder of the book moves beyond these topics and discusses the pretrial process the roles of defense attorneys prosecutors and grand juries plea bargaining and guilty pleas rights of criminal defendants at trial and appeals and habeas corpus presentation the material in criminal procedure is covered in large part by focusing on the constitutional rights of criminal defendants as interpreted by the u s supreme court to this end many leading supreme court decisions are discussed however lengthy excerpts from the actual decisions have been reduced to relevant remarks in order to avoid distracting from the many important concepts introduced in order to maintain a real world focus the book also incorporates many actual legal documents and excerpts from official policy manuals of police departments and other criminal justice agencies around the united states criminal procedure should not be confused with evidence procedure or trial procedure evidence procedure concerns the rules for presenting evidence to prove guilt or the lack thereof thus evidence courses cover such topics as types of evidence rules for presenting witness testimony hearsay and the like this book touches on evidence only tangentially by discussing witness questioning and the police actions used to secure evidence through search and seizure but the focus on evidence does not move beyond these two issues likewise this book is not about trial procedure that is it does not address the nuances of criminal trials including the order of events at trial what objections can be raised instructions to the jury and so on trial procedure is a topic typically covered in law school instead this book presents a comprehensive introduction to criminal procedure thoroughly presenting basic legal concepts and issues in a conversational written style and tone given this content coverage and the frequent use of examples from actual legal documents and policy guides readers who are pursuing careers in criminal justice
